

WHAT ARE YOUR LIFESTYLE RISKS?

YOUR RISK OF A DISABILITY

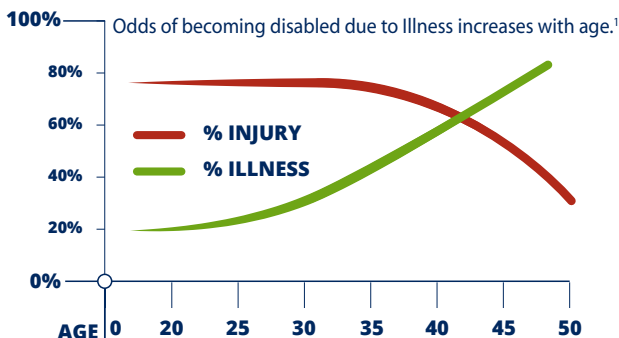

Chances of becoming disabled for 3 months or more before age 65¹

In addition, if your disability does last more than 90 days, the average length of a disability will be¹:

AGE	DURATION	AGE	DURATION
25	2.1 years	45	3.2 years
30	2.5 years	50	3.1 years
35	2.8 years	55	2.6 years
40	3.1 years	60	1.6 years

YOUR RISK OF INJURY vs ILLNESS

WHAT ARE YOUR OPTIONS?

SAVINGS?

Let's say you saved 5% of your income each year. Six months of a total disability could wipe out 10 years of savings.

YOUR SPOUSE WORKS?

Would one income be enough if you are currently living off two? Will your spouse be able to juggle work and take care of you?

BORROW IT?

You might have a difficult time securing a loan when you're disabled. Where is the money going to come from to pay the loan back?

GROUP COVERAGE?

Even if you have group benefits, they may not be adequate over the long term. Many group plans may only replace about half of your net income. Is that enough?

WHAT IS "LIFESTYLE"?

It's the **CARS** we drive....

It's the **HOME** we live in....

It's the **VACATION** we take....

It's the **EDUCATION** we provide....

It's the **RETIREMENT** we save for....

...It's LIVING TODAY while PLANNING for TOMORROW!

And your **INCOME** supports it all!

But what if you were unable to work tomorrow due to an injury or illness?

Would you and your family be protected?
